

## Product datasheet

IMS05

Infrared superstructure motion sensor

- Indoor use
- IP20
- 360° / 6 m

## General information

- |                              |          |
|------------------------------|----------|
| • Model                      | IMS05    |
| • Body material              | Plastic  |
| • Maximum detection distance | 6 meters |
| • Product color              | White    |
| • Detection angle            | 360 °    |
| • IP protection rate         | IP20     |
| • Neto weight                | 0,085 kg |

## Electrical Specifications

- |                 |                             |
|-----------------|-----------------------------|
| • Maximum load  | 1200 W                      |
| • Input voltage | AC 200 - 240 V / 50 - 60 Hz |

## Packing Information

- |                      |                  |
|----------------------|------------------|
| • Size of carton box | 85 x 35 x 115 mm |
| • Gross weight       | 0,115 kg         |

Dimensions

- Product dimensions

Ø 80 x 40 mm
